

Dale School Garden Project

National Education
Nature Park and
Climate Action Awards

What do we need to do? (aim)

Turn a 'grey' space into a 'green' space

How are we going to do this?

Design and build a **garden** in the playground!

How you can help...

Do some 'green space' research

Ask your family and friends to help

Design a garden together in the half term break

Bring your homework back into school after half term

Some hints and tips

Include and label some wildflower options, as they are great for the birds, bees and butterflies!

Some hints and tips

Add and label some 'native' trees to add shade on sunny days and help with drainage on wet and wild days

Some hints and tips

Think about and include fruits and vegetables that we could grow in our climate...

Oranges are delicious, but we don't get enough warm weather to grow them in England!

Some hints and tips

Plan how we will move around the garden.
Think about signs, paths, benches and areas for planting and relaxing!

Some hints and tips

How will we keep the area safe and usable? Think about fencing, gates, sheds and the tools we'll need to take care of the space.

What to include

Native
Trees

Fruit and
Vegetables

Wildflowers

Sheds
and Tools

Paths
and Fences

Make it
Colourful!

Homework sheets will be handed out tomorrow
(Friday 16th February)

Please return your designs to your class
teacher no later than Tuesday 27th February
